

WELCOME TO SAINT ALPHONSUS

Saint Alphonsus is built on a strong foundation as a member of Trinity Health. Trinity Health is one of the largest multi-institutional healthcare delivery systems in the nation. It serves people and communities in 20 states from coast to coast with 86 hospitals, 109 continuing care facilities and home health and hospice programs that provide nearly 2.8 million visits annually. In May 2013, Trinity Health and Catholic Health East closed their consolidation to strengthen their shared mission, increase excellence in care and advance transformative efforts with their unified voice.

With FY2014 annual operating revenues of \$13.6 billion and assets of \$20.4 billion, the organization returned almost \$900 million to its communities in the form of charity care and other community benefit programs.

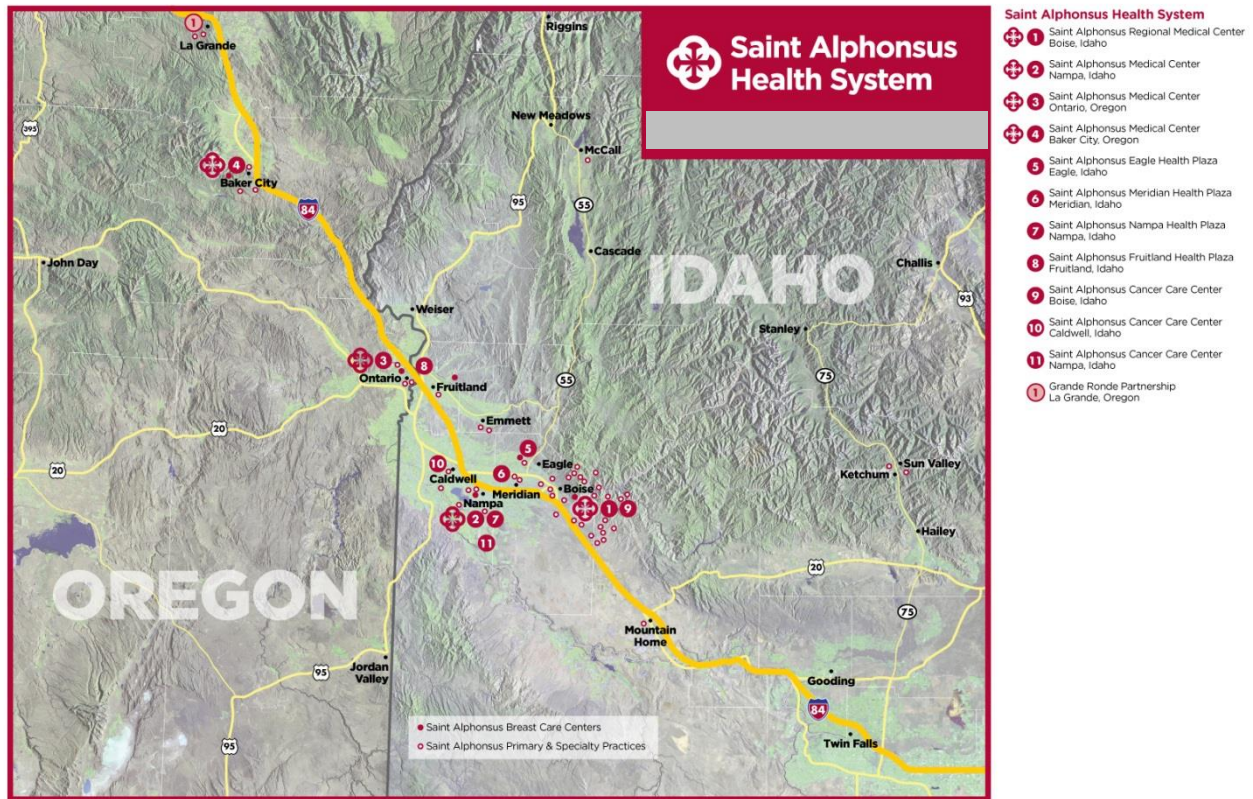

Trinity Health employs more than 89,000 people, including 3,300 employed physicians. Committed to those who are poor and underserved in its communities, Trinity Health is known for its focus on the country's aging population. As a single, unified ministry, the organization is the innovator of Senior Emergency Departments, is the largest not-for-profit provider of home healthcare services — ranked by number of visits — in the nation, and is the nation's leading provider of PACE (Program of All Inclusive Care for the Elderly) based on the number of available programs.

Trinity Health builds on the courageous and progressive people-centered care that started with our founding congregations more than 170 years ago. Today, diverse leaders from many organizations carry this legacy forward to meet the challenges of the future, with the confidence that we are stronger together.

Saint Alphonsus Health System is a regional, faith-based, not-for-profit four-hospital and 60-clinic system that serves the health and wellness needs of over 700,000 people in southwestern Idaho, eastern Oregon and northern Nevada. We are primarily located along the Interstate-84 corridor running through Idaho-Oregon with hospitals located in Boise and Nampa, Idaho, and Ontario and Baker City, Oregon.

Saint Alphonsus is on a journey to full clinical integration and developing population health management capabilities that engage patients in wellness and prevention efforts, provide value-based care along a strong, broad continuum, and differentiate our services through cost and quality outcomes. Proof of these efforts comes through being recently selected as a new Medicare Shared Savings Program Accountable Care Organization (MSSP-ACO).

The foundation for award winning care delivered in all four hospitals is **Saint Alphonus Regional Medical Center**, the flagship 381-bed tertiary hospital, the first hospital built in Boise, and the region’s only nationally recognized Trauma, Chest Pain, Diabetes and Primary Stroke Center. Noted as one of the most advanced medical centers in the Pacific Northwest, it offers all private patient rooms, state-of-the-art surgical operating theatres, and the most sophisticated diagnostic and treatment technologies, including the regions only 640-slice CT, Neuro BiPlane Angiography, Minimally Invasive Cardiac Surgery, Stereotaxis, daVinci Si 4Arm Surgical System, MAKOplasty Partial Knee and STAR Total Ankle Replacement.

Boise offers a full range of critical care services:

- Emergency & Trauma Center
- Intensive Care
- Intensivist & Hospitalist Services
- Heart & Vascular – CVICU, CCU
- Neurosciences
- Orthopedics
- Cancer Care
- General & Trauma Surgery
- Maternity & NICU
- Mammography
- Outpatient Procedures
- Radiology & Medical Imaging
- Rehabilitation
- Sleep Disorders
- Pulmonary
- Nutrition and Diabetic Education
- Pain Management
- Pediatrics
- Behavioral Health
- Laboratory
- Telemedicine

Saint Alphonus Medical Center - Nampa is a 100-bed acute care hospital serving the medical needs of Canyon County and surrounding areas for nearly 100 years. Based in the one of the fastest growing cities in Idaho, the 240,000 square foot facility features a complete diagnostic center, 6-suite surgical operating theatre, pre/post-operative holding and recovery rooms, a 10-bed short-stay observation unit, spacious and private patient rooms, and an 18-bed intensive care unit. Built with preventive and ambulatory health in mind, the facility accommodates the latest information technology, updated diagnostic and treatment technology, and an environment proved to reduce patient stress and recovery times.

Nampa offers a full range of services, keeping quality care close to home.

- Family Medicine
- Cancer Care & Infusion
- Maternity & NICU
- Emergency
- General Surgery
- Ear, Nose & Throat
- Podiatry
- Urology
- Laboratory
- Mammography
- Orthopedics
- Outpatient Procedures
- Radiology
- Rehabilitation
- Cardiology
- Neurology
- Sleep Disorders
- Pulmonary
- Nutrition and Diabetic Education

Saint Alphonus Medical Center - Ontario is a 49-licensed bed community hospital providing care for those in eastern Oregon and southwestern Idaho for over 100 years. Since becoming part the Health System in 2010, Saint Alphonus - Ontario has invested over \$28 million on expanding services, installing state-of-the-art technologies, bringing new primary care and specialty physicians to Ontario, Fruitland, and New Plymouth, and making investments to upgrade patient rooms, the Maternity Center and other facilities. This investment includes a newly built Health Plaza in Fruitland that offers primary and specialty care, lab, medical imaging, and rehabilitation services, as well as purchasing and remodeling a complex across from the hospital for new ambulatory services, which will open later this year as the Ontario Health Plaza.

Ontario offers a full range of services, keeping quality care close to home:

- Internal & Family Medicine
- Cancer Care & Infusion
- Maternity & Gynecology
- Emergency
- General Surgery
- Ear, Nose & Throat
- Podiatry
- Urology
- Laboratory
- Mammography
- Orthopedics
- Radiology
- Outpatient Surgery Procedures
- Physical, Occupational & Speech Therapy
- Cardiology
- Neurology
- Sleep Disorders
- Wound Care
- Pediatric Care
- Nutrition and Diabetic Education
- Rheumatology

Saint Alphonus Medical Center—Baker City is a 25 bed critical access not-for-profit hospital located in Baker City, Oregon and nestled beneath the Elkhorn Mountains. Having been a part of Baker County for nearly 113 years, we have developed relationships with those we serve—in many ways. Our concern and personal touch have become our tradition, and our professionalism and warmth continue to radiate into our

community. Saint Alphonsus has been highly engaged as a member of the Eastern Oregon Coordinated Care Organization (EOCCO), and has been on an integration journey with other rural hospitals to transform how healthcare is delivered throughout eastern Oregon. In 2012 there were 2 Primary Care Medical Homes in Oregon and currently there are over 70. This focus to more health, wellness and coordinated care is leading efforts throughout our Health System.

Baker City offers a range of services, keeping quality care close to home:

- Express Care
- Family Medicine
- Cancer Care & Infusion Services
- Maternity & Gynecology
- Emergency
- General Surgery
- Mammography
- Orthopedics
- Radiology
- Physical, Occupational & Speech Therapy
- Rheumatology
- Cardiology
- Neurology
- Sleep Disorders
- Nutrition and Diabetic Education

Saint Alphonsus Medical Group is one of the largest employed primary care and specialty physician networks in the region with more than 300 providers located at over 85 clinics from Boise to Baker City. This expanding multi-specialty medical group practice delivers a multi-disciplinary, team approach to patient care. With the provider focus on patients, practicing state-of-the-art, evidence-based, quality medicine, collaborating on care delivery, taking ownership of practicing to accepted clinical standards of care, and embracing change, innovation and continuous improvement, the Medical Group is delivering a high standard of care throughout the region.

In order to better serve our region we have developed strong care continuums that are present at all four hospitals and throughout the region. Saint Alphonsus has made great strides in less than five years, since these four hospitals merged, in collaborating and extending our network to deliver a consistent quality of care for these services, in particular:

- Primary Care
- Emergency & Trauma
- Heart Care
- Neurosciences
- Orthopedics
- Cancer Care
- Breast Care
- Maternity & Neonatal ICUs
- Diabetes Care & Education
- Sleep Disorders Centers

- Telemedicine Network
- Wound Healing & Hyperbaric Medicine

INNOVATIVE, QUALITY CARE

Each year we invest millions of dollars toward new and enhanced healthcare facilities, clinical information systems and state-of-the-art technologies in our pursuit for better, safer and faster ways to heal. We have integrated electronic health records in all four hospitals and our primary care clinics. We have established Quality Care Continuums in a broad spectrum of conditions, including stroke, diabetes, pregnancy, breast cancer, congestive heart failure and joint replacement surgery and are seeing very positive results from these continuums. Most recently we announced the development of an \$80 million replacement hospital in Nampa to better support the changing infrastructure, technology and access needs of that growing population.

The care provided by our over 6000 Colleagues and Medical Staff has proven itself in countless national, state and regional clinical excellence awards. Adding to this strong foundation is our physician-led Saint Alphonsus Health Alliance, which includes over 1500 physicians and providers, 8 hospitals and 9 surgery centers at the forefront of innovation and unprecedented teamwork across all medical and surgical specialties.

Saint Alphonsus Health Alliance is a collaborative, clinically-integrated network sponsored by Saint Alphonsus Health System. The Alliance is a network of hospitals, doctors and providers – both employed and independent - working together to see the best care principles are being delivered, so we can make unprecedented shifts towards reducing costs, improving care quality and rewarding great outcomes. Through the use of integrated IT systems that generate real-time quality data, Alliance members will be able to better manage and monitor their patients' chronic disease and wellness needs and deliver more effective and valuable care.

The Alliance is working to help:

- People currently healthy remain that way
- Providers stay on top of care and focused on early detection for people who have high risks for becoming ill
- Reduce healthcare costs by improving outcomes
- Prevent expensive complications
- Reduce avoidable hospitalizations
- Reduce expensive duplication of services by better managing or coordinating care beyond a doctor or hospital visit

MISSION-DRIVEN PURPOSE

For over 100 years, our four hospitals and our physicians have been a symbol of healing and hope for people in our communities. Our Sisters were called in years past and we are called today to heal the body, mind and spirit of our patients, improve the health of our communities and steward the resources entrusted to us.

As a not-for-profit Health System, each hospital reinvests its profits back into the community, focusing on programs with the greatest need. Using evidence-based principles, these programs help fight obesity, provide tobacco prevention and cessation, give babies every chance for a healthy start in life, strengthen workplace health, help special populations manage chronic conditions like heart disease and diabetes, provide free or low-cost health screening and education, support behavioral health programs, and deliver special care for the vulnerable and elderly.

While healthcare becomes more complex with each passing day, Saint Alphonsus Health System is anchored in the simplicity of our purpose. That purpose is reflected in our Mission to serve as a compassionate and transforming healing presence within our communities and deliver exceptional quality care close to home.
